

Cost Reduced in The Kinsenda Tailings Storage Facility (TSF)

The Kinsenda Tailings Storage Facility (TSF) forms part of the overall processing facility at Kinsenda (KICC). Overall the project started on 24 June 2015, and was completed on 28 April 2016, almost 3 weeks ahead of schedule. The overall contract finished almost US\$300,000 under budget.

The TSF has a basin area of 311,551 m² and a volume of approximately 500,000m³. This means a tonnage storage volume of over 700,000 tonnes. Over the life of the mine of 15 years, it is expected that the dam will contain over 4.5million tonnes.
